USTS Environment Policy

USTS believes in conducting its business in an environmental friendly way. We carry out our business activities in compliance with ISO 14001 environmental regulation standards. We are reducing our carbon foot-print by involving our employees, customers, partners and suppliers in various Green initiatives.

Our Environmental policy is based on these sound principles:

- To create an **environmental awareness** among internal stakeholders and thus work towards creating environmentally responsible corporate citizens.
- Widely communicate our **environmental commitment** to clients, vendors, employees, and the public and encourage them to support it, and to spread the awareness of advantages of environmental friendly workplace.
- Endorse for **'Green Procurement Management'** to the extend we can.
- Endorse the procurement and use (and reuse) of **recycled, recyclable or re-furbished merchandise** wherever these options are available, economical and appropriate.
- Adhere to **optimal utilisation of resources**, in form of material, goods or otherwise.
- Adhere to carrying out our activities and practices, including **disposal** of electronic wastes, in a manner to prevent environmental pollution.
- Endeavour towards **continuous improvement** of our environmental performance and towards minimising the impact on society at large.

We will do so by meeting and exceeding relevant objectives and targets and by periodically reviewing our environmental policy in the light of our current and planned future activities.
