COMPQSOFT Application Service Offerings

Application Development : CompQsoft has successfully completed and delivered many innovative application development projects globally by adopting flexible and scalable architectures that ensure 24x7 Business availability and reduced development cycles.

Application Management : CompQsoft's Application Management service provides its clients high value and quality support and maintenance services by operating on a continuous improving service model based on advanced processes'.

Offshore Software Product Development : Since 1997, CompQsoft has helped established growing startup software product companies get their products to the market faster in cost effective manner. We have provided a lot of cost effective value addition to the overall product management process, right from the conceptualization to development to beta testing to launch to post launch support and maintenance.

User Interface Enhancement: There are several options and interfaces available through which the users can interact with the current applications. Improving or Enhancing the Interface entails moving the core application as is, and building wrapper systems around it. This is useful when one is interested in considering few technology up-gradation, while not disturbing the Existing environmental framework.

Legacy Migration: CompQsoft's migration team understands how critical it is to adopt new technology and keep current applications in place. Legacy Migration is an opportunity to align business processes more closely with new IT capabilities.
