Simple solutions to COMPLEX PROBLEMS

Let us manage your environmental and compliance issues so you can get back to doing what you do best, with the confidence that your building is safe! As experts in identifying and assessing environmental issues in commercial and residential buildings, we specialize in assessing the scale and scope of work needed, and finding the most cost-effective solutions.

With more than 30 years of experience and commitment to human health & safety, ETC is dedicated to helping you navigate the sea of red tape.

Jobsite Air Monitoring

We're experts on OSHA regulations, which means our air monitoring services will not only keep you and your workers within permissible levels of exposure, but will also help you avoid audits.

Inspection & Assessments

Our lead, asbestos, mold & hazardous material investigations include comprehensive recommendations about how to manage hazards. We can also manage your entire project from start to finish.

Full-Service Solutions

From inspections to oversight to recommended remediation, ETC has all of your environmental service needs covered! We know how to find solutions to complex problems that limit liability and minimize cost.

PROFESSIONAL certification

Affordable. We offer competitive pricing for single-student sessions, and can offer large discounts for larger groups.

Convenient & Flexible. Our classes are available online, in person at our facility, and we can even train your group at a location convenient to you! (Our trainers can travel anywhere in Michigan.)

Practical & Professional. Our certified trainers have extensive field and educational experience. Our classes are consistently updated to include the most up-to-date information, with a focus on practical application of best practices.

environmental testing laboratories

We are dedicated to meeting turnaround times and will work with you to make sure you get you exactly what you need – when you need it!

Cutting edge TECHNOLOGY

With a focus on customer service

Our mission is to provide timely, accurate, and affordable analysis of hazardous materials. With one of the largest single location laboratories in the country, we can offer sample consulting for homeowners, customized reporting for contractors, and several drop-box locations.

We analyze samples from across the U.S.

Our **asbestos** services include PLM, PCM, Point Counting and Gravimetric Reduction analysis. We also analyze **mold** in bulk material, tape, and air samples with incredible accuracy. In partnership with a nationally accredited lead lab, we offer **lead** analysis from dust wipes, paint chips, or water samples.
