

environmental testing laboratories

We are dedicated to meeting turnaround times and will work with you to make sure you get you exactly what you need – when you need it!

Cutting edge TECHNOLOGY

With a focus on customer service

Our mission is to provide timely, accurate, and affordable analysis of hazardous materials. With one of the largest single location laboratories in the country, we can offer sample consulting for homeowners, customized reporting for contractors, and several drop-box locations.

We analyze samples from across the U.S.

Our **asbestos** services include PLM, PCM, Point Counting and Gravimetric Reduction analysis. We also analyze **mold** in bulk material, tape, and air samples with incredible accuracy. In partnership with a nationally accredited lead lab, we offer **lead** analysis from dust wipes, paint chips, or water samples.

high VOLUME

quick TURNAROUND

nationally ACCREDITED

Bundle and Save!

We have special pricing packages for clients interested in getting all of their hazardous materials testing – lead, asbestos, and mold – from one source.
